PROFILE

- Full-stack developer proficient in **Laravel, MERN, Next.js, Django**, and languages including **Python, JavaScript, C, C++, and Java**.
- Builds scalable backends and APIs using **Node.js**, optimized with **Redis** and containerized via **Docker**.
- Crafts responsive, polished UIs with **Bootstrap** and **Tailwind CSS**.
- Implements and customizes **ERPNext** for enterprise business operations.
- Automates workflows via **Google Apps Script** and delivers client-ready sites with **Webflow**.
- Proficient in leveraging **AI tools and Claude Code** to enhance productivity and streamline development workflows.
- Committed to clean, maintainable code and solutions that drive real results.

WORK EXPERIENCE

Systems Developer II, Borland Development Corporation

2023 – present

Quezon City, Philippines

- Designed and developed an engaging **marketing website using Webflow**, creating a visually stunning and interactive platform that effectively showcases company products and strengthens brand presence.
- Built a comprehensive **HR careers portal with Webflow** that streamlines job postings and applicant tracking, simplifying HR workflows for managing listings, reviewing applications, and monitoring candidates.
- Developed a dynamic **local accounting application using Next.js** focused on check monitoring, improving user interaction and supporting complex accounting tasks with enhanced accuracy and operational efficiency.
- Built an **online reservation system using Next.js and Redis**, leveraging Redis for fast, real-time data handling to deliver a seamless and responsive booking experience.
- Constructed an **internal case management platform using Next.js** for the legal team, providing a structured system for handling case documentation, tracking progress, and boosting organizational efficiency.
- Implemented a **centralized auditing system using Google Apps Script** integrated into Google Sheets, streamlining the review process for receipts and passbooks for accurate and efficient auditing.
- Engineered an **automated commission system with Google Apps Script** that calculates commissions and generates detailed, secure reports — ensuring timely and precise financial management.
- Developed and customized **business workflows in ERPNext**, automating enterprise processes and improving operational efficiency across departments.
- **Dockerized** application environments to ensure consistent, portable, and production-ready deployments across development and staging pipelines.
- Manages **Google Cloud Platform (GCP) VM instances**, handling provisioning, configuration, and maintenance to ensure reliable and scalable cloud infrastructure.
- Actively **enhances and refactors codebases using Claude Code**, improving code quality, accelerating development cycles, and delivering cleaner, more maintainable solutions.

IT Intern, TTEC Holdings Inc. 📧

Jan 2023 – Apr 2023

Novaliches, Quezon City

- Structured Cable Management
- Operating System Image Deployment
- Hard Disk Sanitation
- Computer System Integration and Disassembly
- Hardware Troubleshooting

EDUCATION

Bachelor of Science in Information Technology, *Bulacan State University*
Cum Laude

2019 – 2023
San Jose del Monte,
Bulacan

Information and Communications Technology,
San Jose del Monte National Trade School
Senior Highschool

2017 – 2019
San Jose del Monte,
Bulacan

SKILLS

UI/UX Designing

Wireframe/Prototype using software like Figma

System Development

Webflow, Next.js, Google Apps Script

Programming Languages

JavaScript, Python

Frameworks and Platforms

Laravel, MERN Stack, Django, Next.js

Code Optimization

Performance enhancement and system scalability

Android and iOS Development

React Native, Expo

CERTIFICATES

National Certificate II in Animation
